

# DESOATEN<sup>®</sup> DC-N

## Major component

- Aliphatic aldehyde

## Property

- The product has a special affinity to leather fiber, thus, penetration and absorption of tanning agents, fatliquors, dyestuff can be promoted.
- When used before chrome tanning, it will promote even distribution of chrome and give fine grain.
- When used for the pretanning of sheep leather, even distribution of natural fat can be achieved.
- When used during fatliquoring, give leather an enhanced softness and natural surface handle.

## Specification

Appearance(25°C):	Clear or slightly turbid liquid
Color:	Colorless to yellowish
pH(10% aqueous solution, 25°C):	7.0±1.0
Active matter %:	45.0±2.0

## Application

- Recommended dosage (in terms of pelt) for pretanning or main tanning: 1.0~2.0%.
- Recommended dosage (in terms of shaved wet-blue) for retanning: 2.0~6.0%.

## Safety

- Aldehyde compound, pay attention to personal protection when handling this product.
- Observe all the precautions required for handling chemicals.
- Read attentively and observe all the recommendations in our **Material Safety Data Sheet**.

# DESOATEN<sup>®</sup> DC-N

## Transportation and Storage

- The product has a shelf life of at least one year if it is stored in its tightly sealed original packaging at temperatures between 0°C and 40°C.
- This product should be stored in a cool and dry place, lidded and keep upright. Avoid direct exposure to the sun or frost.
- This product may be slightly turbid. According to the storage conditions the fine dispersive particles can coagulate and form white flakes. The properties of the product are not affected.
- Re-seal the package immediately after using, use up as soon as possible once the package is opened.
- Read attentively and observe all the recommendations in our **Material Safety Data Sheet**.
