

DESOADDI® AW5108

Major component

- Derivatives of higher aliphatic hydrocarbon, emulsifiers.

Property

- Efficient anti-sticking properties, significantly improving the plate-release and stacking properties.
- Does not affect the gloss of the coating.
- Endow the leather with a soft, oily waxy feel and reduce the plastic feel of the coating.

Specification

Appearance(25°C):	Milky white liquid
Solid Content(%):	~11.0
pH(10.0% aqueous solution, 25°C):	~9.0
Ionicity:	Anionic

Application

- **DESOADDI AW5108** is an excellent plate-releasing wax emulsion. It has good plate-release characteristics and a certain oily feel when used in the bottom and middle slurry, and it can avoid the excessive resin feel of the coating.
- 5-10% **DESOADDI AW5108** of the total amount of coating slurry is usually enough to improve the plate-release and stacking properties, and the amount of addition needs to be tested according to the viscosity of the coating resin.

Safety

- This is not a hazardous chemical.
- Observe all the precautions required for handling chemicals.
- Read attentively and observe all the recommendations in our **Material Safety Data Sheet**.

DESOADDI[®] AW5108

Transportation and Storage

- The product has a shelf life of at least one year if it is stored in its tightly sealed original packaging at temperatures between 5°C and 35°C.
- The product should be stored in a cool and dry place, with no throwing, avoid direct exposure to the sun or rain or humidity.
- This product may be stratified during storage, and the application effect will not be affected if using it after mixing evenly.
- Re-seal the package immediately after using, use up as soon as possible once the package is opened.
- Read attentively and observe all the recommendations in our **Material Safety Data Sheet**.
